ABSTRACT OF THE DISCLOSURE

For example, an image processing device which can be operated from both remote user interface such as a Web browser and local interface by an operation

5   panel or a card reader, and a computer system communicating with the device are embodied. A system of integrating authenticating processes by each of the remote and local user interfaces can be provided. In this case, an adjustment is made not to cause

10 inconsistency by the conflict between the operation from the remote user interface and the operation from the local user interface so as to practically utilize each user interface.
